

Amendments to the Claims:

Please cancel claims 1 to 5 and add claims 6 to 10 as follows:

Listing of Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1 to 5 (Cancelled).

6. (New) An arrangement for guiding individual reinforcement filaments onto a carrier defining a carrier axis (X) with said carrier being moveable in the direction of said carrier axis (X), the arrangement comprising:

5           a positioning disc having a plurality of filament guides arranged distributed on a circular ring of said positioning disc;  
            a rotation-symmetrical deflecting element;  
            said positioning disc and said deflecting element each concentrically enclosing said carrier;

10           said deflecting element being mounted within said positioning disc and being axially aligned to said positioning disc;

            said deflecting element having an end face and a peripherally-extending curved inner edge formed on said end face  
15           and said curved inner edge being toward said carrier at the run-in end; and,

said filament guides opening directly at said curved inner edge.

7. (New) The arrangement of claim 6, wherein said filament guides are configured by struts extending radially or mounted inclined.

8. (New) The arrangement of claim 6, further comprising a circular band-shaped cover disc which can be releasably assembled on the surface of the positioning disc in the region of the filament guides.

9. (New) The arrangement of claim 8, wherein said cover disc has a radially extending slit.

10. (New) The arrangement of claim 8, wherein said cover disc is magnetically adherable to the positioning disc.
